TECHBIO AND MAGIC

Since 2017, Anna has been living in Finland. Before moving, she got directorial education in Saint Petersburg and worked in the film industry for a long time. Anna also won several film contests with her documentary film (her surname during this period was Belyankina).

After moving and adapting, Anna rapidly develops her artistic career, utilizing her extensive experience in directing and leadership. In Finland, Anna attentively observes the unique

Finnish way of life and learns about the culture. The main inspiration for Anna's creativity is the humor of Iiu Susiraja, the friendliness of Teemu Keisteri, and the melancholic aesthetic of Aki Kaurismäki's movies.

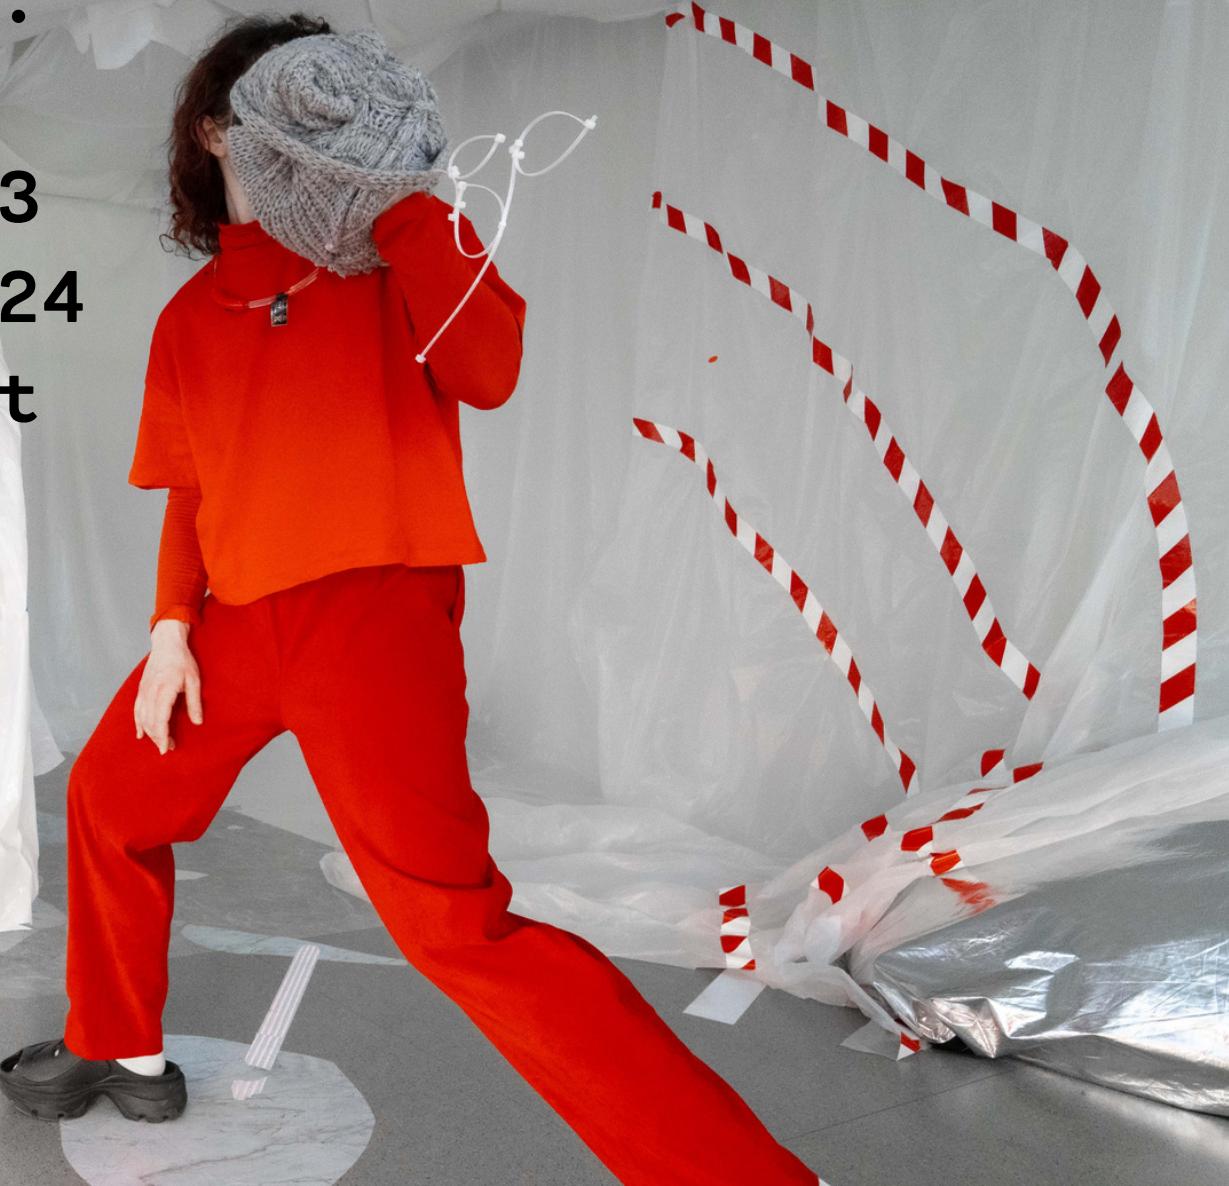

Due to the entrepreneur's challenging life, Anna's career develops in several directions - photography, directing, performance, and Anna's greatest love - installation. Anna describes her artistic style as modest and friendly. Magical realism, suprematist lines, illusions of flight - these are the techniques she employs. The main theme that Anna has identified for herself is protection. So the protection of the fragile - metaphorically and physically, this theme is now woven throughout all of her work until the very end.

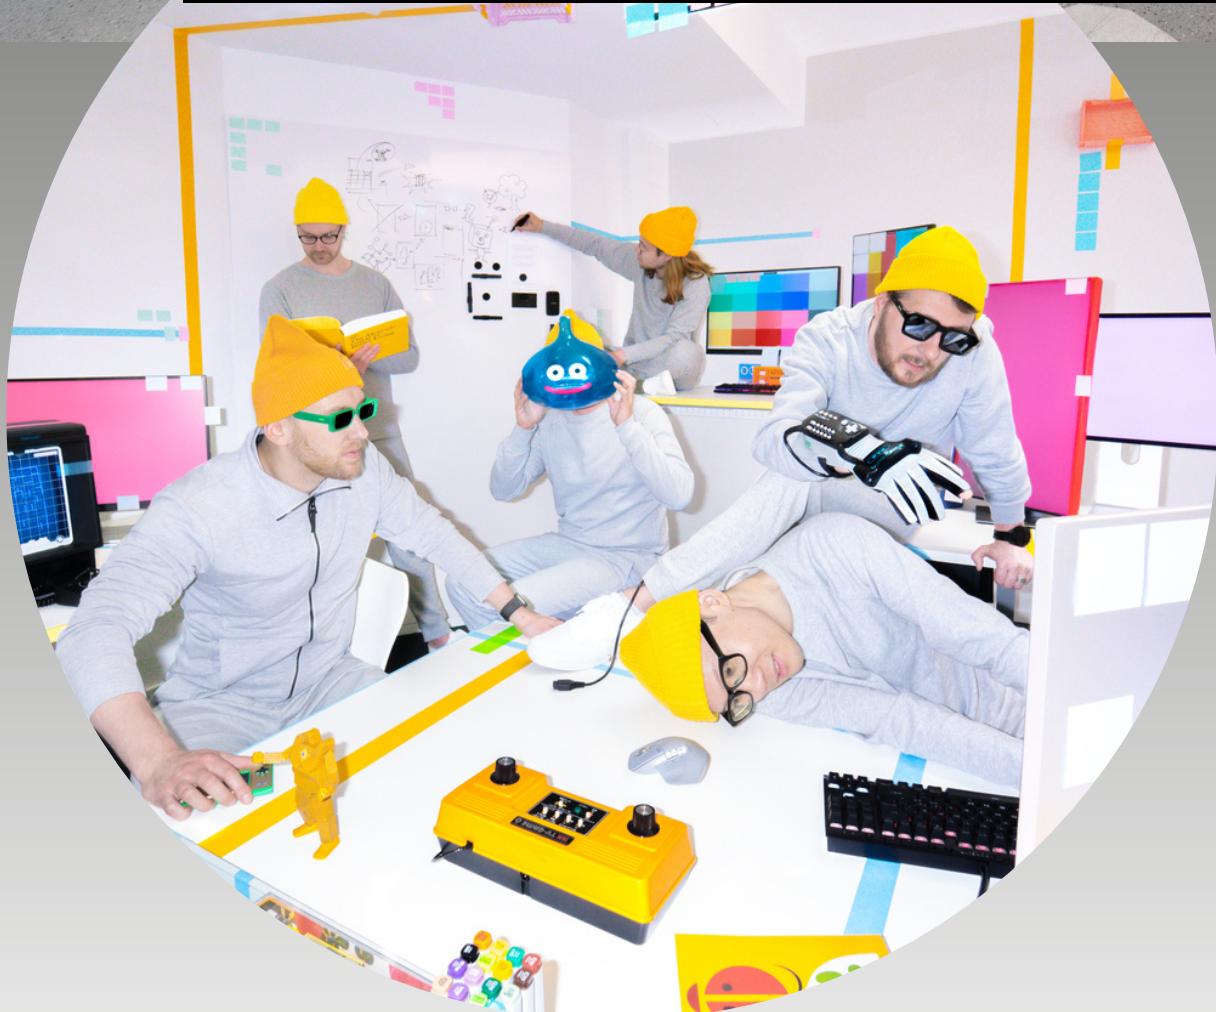

SINITSE - CREATIVE STUDIO IN HELSINKI

Anna built a unique set right in the studio where she has been working since 2023.

Photos taken in this space were shown at the Slush 2023 conference, and in March 2024 Anna shot a short film, shot entirely in the studio.

price 2000 EU

30x30 cm

price 500 EU

print lab "Beyond Print", Keuruu, Finland

INSTALLATIONS

Anna creates installations, experimenting with the meaning of everyday items known to any Prisma shopper. Also, Anna's creative theme of "PROTECTION" is evident when you learn that, for example, this installation called PUPSIK serves as both protection and packaging for Anna's glass prints. More installations are coming in 2024.
